Autocross

The Corvette was designed for maneuverability and performance. The best way to know your car and its limits is to try an autocross course. This is generally laid out over a paved lot and marked with soft orange plastic cones to guide you in the right direction. (Pylon Poop still happens) Sharp turns, equal footing, shifting or automatic, you can legally explore what you and your car can do. Launching your car from a standing start to cruising through the timing lights, your heart rate increases giving you an aerobic workout while comfortably seated behind the wheel. Best of all you can take a series of identical runs to improve your performance and attempt to beat your own time or the person in your class. And of course do not forget the social aspect of mingling with other Corvette nuts, group activities such as picking up cones, borrowing helmets, walking the course, gossip about active handling settings, tires, brakes, or when to brake, and then exchanging trophies or bragging rights at the end of the day.

2008 Autocross at the Ford Plant, Lorain Speedway, and Lakeland Community College

2009 Team Corvette Cleveland entered the ASCC's Club Challenge Auto X at Northfield Park

2010 Mike Bracanovic at Lakeland

2011 Tim Paul at Geauga Lake

2012 Trophies at Sandusky Speedway

2012 Track Workers Janet Carey & Pat Mitchell

2013 Gus Santagata & John Bodner

2013 Berry Pinney

2013 Ross Harrison

Above cars ran in 2015 at Lakeland Community College

2013 Joe Adamcik

Eric Flanhofer in his White C4 passing corner workers Ross Carey and Al Flanhofer 2013 Sandusky Speedway
